Part 2: African Dragon Fruit Association Memberships

Free Membership Offer

To qualify for a free lifetime association membership (2008-2026 founding program), commercial farmers must purchase and plant a minimum of one hectare of dragon fruit plants from Healthy Fields / DFSA cultivars.

Standard Membership Plans

If you have planted dragon fruit from other suppliers and would like to join the African Dragon Fruit Association to benefit from our farmer support systems and market exposure platform, a 6-month to 12-month membership contract is required.

Membership Tier	Duration	Price (ZAR)
Association Membership	6 Months	R 12,600.00
Association Membership	12 Months	R 26,250.00

Benefits of Association Membership

- Access to DFSA technical farming support and consultation.
- Promotion of member farms on the Dragon Fruit Farming Africa platform.
- Access to local and international marketing exposure.
- Participation in farmer training resources and cultivation updates.
- Networking with dragon fruit farmers across Africa.
- Listing in the DFSA business and farm directory.
- Opportunities for collaboration and knowledge sharing.
- Platform includes access to local and international market agents.

Important: The African Dragon Fruit Association does not provide take-off agreements or guaranteed fruit purchasing contracts.

Part 3: Commercial Cultivar Guide

Selecting the right cultivar is the foundation of a highly profitable orchard. Our genetics are rigorously selected for strong plant vigor, reliable production cycles, and superior market appeal.

Premium Flagship Cultivar: Ruby Red (Pink Magenta)

Developed by: DFSA - Max van Heerden
Botanical Name: Hylocereus costaricensis hybrid
Market Class: Premium Export Cultivar
Overview: Ruby Red is our flagship premium dragon fruit cultivar developed by the Dragon Fruit South Africa breeding program. It was specifically selected for exceptional sweetness, vibrant magenta flesh colour, and very large fruit size.
Average Fruit Weight: 800 g - 1.2 kg (Max up to 1.5 kg)
Sweetness: 18 - 22 Brix
Pollination: Self-pollinating. Recommended: 2-4 beehives per hectare.

High-Yield Commercial White: Sweet White Dragon Fruit

Botanical Name: Hylocereus undatus
Overview: A vigorous and reliable commercial cultivar widely cultivated for its consistent yields and refreshing sweetness.
Average Fruit Weight: 400 g - 700 g (Max up to 900 g)
Sweetness: 14 - 18 Brix
Pollination: Self-pollinating. Recommended: 2-4 beehives per hectare.

Vietnamese Giant White

Botanical Name: Hylocereus undatus
Overview: Renowned for producing large attractive fruit, rapid growth, and dependable flowering cycles.
Average Fruit Weight: 600 g - 900 g (Max up to 1.2-1.3 kg)
Sweetness: 15 - 17 Brix
Pollination: Self-pollinating. Recommended: 2-4 beehives per hectare.

Premium Specialty: Israel Gold

Botanical Name: Hylocereus undatus
Overview: A premium yellow dragon fruit highly prized for its extreme flavour intensity and unique appearance.
Average Fruit Weight: 350 g - 550 g (Max up to 800 g)
Sweetness: 19 - 23 Brix
Pollination: Non-self-pollinating. Cross-pollination is required.

Purple Haze - XXL Fruit Sweet

Botanical Name: Hylocereus hybrid
Overview: A well-known hybrid producing large fruit with deep purple flesh. Heavily sought after in premium markets.
Average Fruit Weight: 600 g - 900 g (Max up to 1.3 kg)
Sweetness: 18 - 20 Brix
Pollination: Self-pollinating.

Zamorano

Botanical Name: Hylocereus polyrhizus hybrid
Overview: A highly productive commercial hybrid developed in Central America with incredible plant vigor.
Average Fruit Weight: 450 g - 750 g (Max up to 1 kg)
Sweetness: 16 - 19 Brix
Pollination: Non-self-pollinating. Cross-pollination significantly improves size.
